

Modifications to Rimses and modules version 6.9

RIMSES MOBILE SAFETY (SAFETY MODULE)

- Rimses mobile safety is a new Android application. It enables the user to handle Lockout/Tagout procedures.

RIMSES MOBILE WORK REQUEST (OPTIONAL)

- Establish and follow up work request easily with your mobile.
- Added developments:
- Couple more than one document to one work request
- Documents can be printed by default with the work order
- Resending rejected work requests
- Reason for rejection shown
- Search without wildcards

OBJECTS

- Create objects with a prefix

WORK PROCESS

- Consult or manage work requests and work orders from the Bill of material or from view/Edit objects
- View/edit logbook entries when terminating a work order
- Go to the main installation from work order in the bill of material
- Defaulting "Estimate all" from work order estimates or from standard activities
- Enable changes to requested dates in a work request, with logging
- Overview costs per work order : Cost date field added to the selection window
